Hi Evelyn,

Apologies for the delay of my testimonial, I had been juggling a few things during the pandemic, including working from home and home schooling my two kids. I'm on annual leave at the moment so got the time to sit and write a few words for Dr. Gupta's website. I hope you can still make use of it. Please feel free to correct my spelling as my English is far from perfect. No issue to include my name if you think that would help.

Dr. Gupta is very compassionate and has an incredible knowledge base in functional medicine. Since the very first call, he was always available with appointments and quick to follow-up with updates to my mother's health plan. She's feeling the best she has in years and I'm very grateful to have witnessed this change. She had been through many expensive doctors, procedures and had been given lots of drops and medicines which just had a temporarily relief to her eye condition. She's now finally on the right track and I credit Dr. Gupta for her improvement."
